Forecast for Wednesday 15 May 2024

Weather: Dry, with cloud covering summits during the early hours. Some patchy light rain possible first thing on Wednesday morning, followed by light showers. Sunny spells and patchy cloud for much of the range through the middle of the day and afternoon, with a chance of isolated showers, some of which may be heavy and thundery. Becoming dry again in the evening.

Chance of cloud-free hill tops above 800m: 40% initially, becoming 95% by late morning.

Low Cloud and visibility: Scattered amounts of cloud across the range through the day with cloud developing most extensively down to 600m across summits and southeastern facing slopes in the morning. Cloud generally lifting above summits by late morning. Visibility generally very good with clear views of distant hills, but moderate in rainfall, a chance of poor in thundery downpours or over summits early.

Meteorologist's View

Conditions becoming more favourable from late morning, with a small chance of a thundery downpour in the afternoon. Packable waterproofs and sun protection recommended.

Forecast for Thursday 16 May 2024

Weather: Generally dry to start but cloudy on southern and eastern facing slopes initially and across summits. Cloud soon lifting above summits, with some good sunny intervals through the day and isolated potentially heavy and thundery showers.

Maximum wind: Northerly 15 mph.

Chance of cloud-free hill tops above 800m: 30% initially, rising to 100% by mid-morning.

Low Cloud and visibility: Cloud developing most extensively down to 600m across summits and southern/eastern facing slopes in the morning. Cloud generally lifting above summits by late morning. Visibility generally very good with clear views of distant hills, but poor in cloud over summits early, perhaps poor in heavy thundery showers later.

Temperature: **Valleys:** Plus 10 Celsius becoming 20 Celsius.
At 800m: Plus 8 Celsius becoming 13 Celsius.
Freezing level: Above summits.
